

NEW PARADIGM:

Protect Employees Outside of the Corporate Buildings

Extend the Duty-of-Care to all employees, even when they're outside your buildings. Affordable 24/7 protection for your lone workers, commuters, workers from home and travelers (domestically and internationally).

The Unresolved Security Problem:

Protecting and enhancing the peace-of-mind of your employees, when on-the-go outside of the facilities. When they are uncomfortable or unsafe it is typically premature to dial 911... until it is too late.

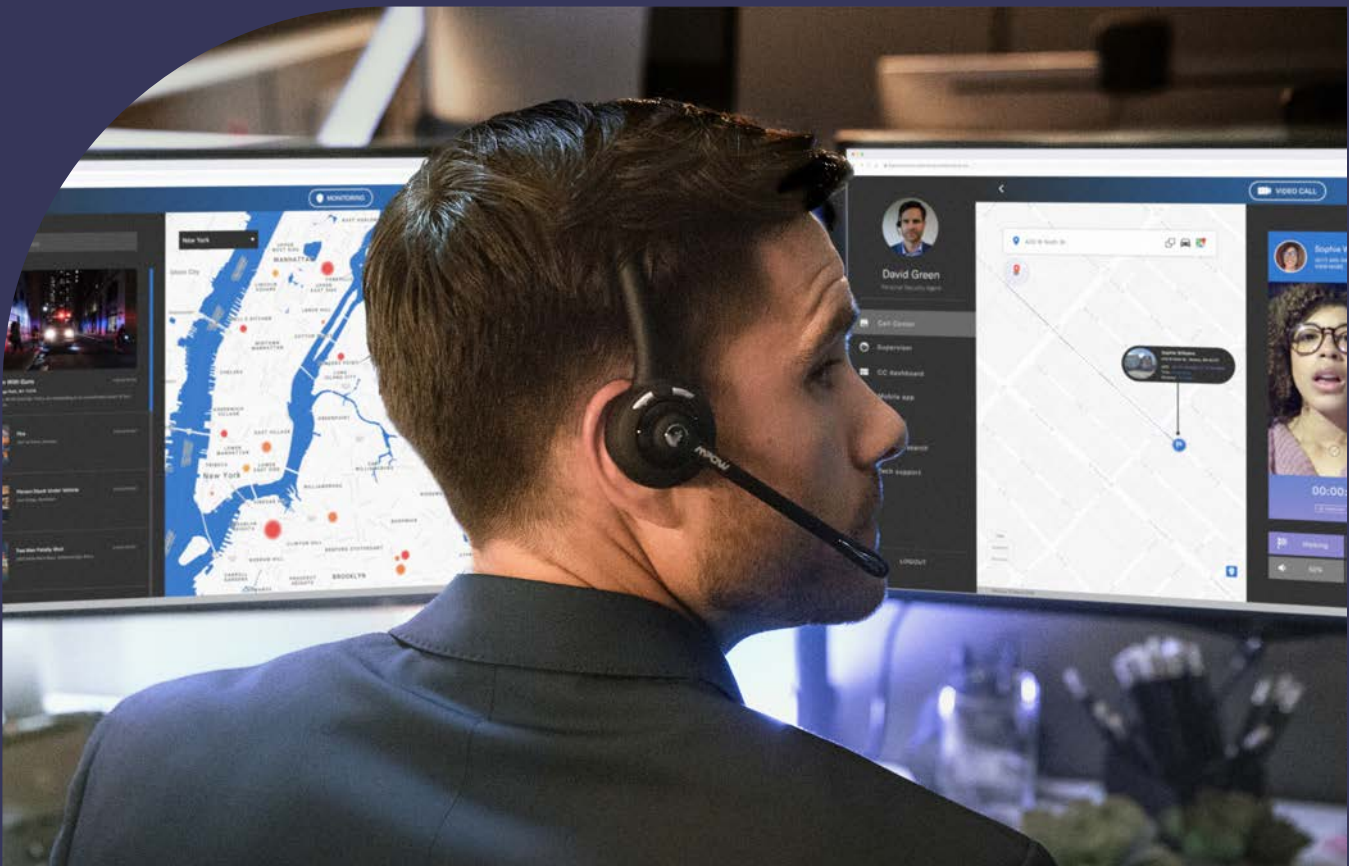

What are the requirements for a solution?

Professional-grade service, combining security experts and sophisticated technologies and AI, that is available 24/7 within seconds.

Keeps an eye on you or your loved ones well before an emergency while also preserving privacy.

Intervenes to prevent or defuse a threat; or orchestrate assistance from first responders and other resources.

And it does all of this while being affordable, highly scalable and with minimal set-up cost or time.

The Bond Solution:

A proven, professional grade, preventative security platform with a broad range of on-demand monitoring services.

Able to detect threats, defuse situations, and even orchestrate help from authorities; anchoring on 24/7 Bond Personal Security Agents who respond in seconds via the Bond mobile app.

"Bond's unique combination of human and technological excellence extends the frontier of personal security beyond what has been available in terms of affordability, effectiveness, and without compromising privacy."

- Mark J. Sullivan, Former Director, U.S. Secret Service

"Now, more than ever, when security professionals are called to lead, Bond can be relied upon as your innovation and execution partner. Bond is ahead of the curve, protecting employees outside of corporate buildings."

- Raymond Kelly, Former NYPD Commissioner

Bond solutions are endorsed by world-class security experts:

Mark J. Sullivan

Former Director, U.S. Secret Service

John Pistole

Former Deputy Director, FBI
Former Administrator, TSA

Raymond Kelly

Former NYPD Commissioner

Kathleen O'Toole

Former Seattle Chief of Police
Former Boston Police Commissioner

Ed Davis

Former Boston Police Commissioner

Jody Weis

Former Superintendent, Chicago PD
Former Special Agent in Charge, FBI,
Philadelphia Field Office

Richard Staropoli

Former CIO, DHS

Former Special Agent, U.S. Secret
Service

Chiko Scozzafava

CSO, Global Nonprofit
Former Special Agent, U.S. Secret
Service

Bond 24/7 Personal Security Agents:

Based in Bond Command Centers

Available within seconds via the
Bond mobile app.

Background checked & extensively
trained on security protocols and Bond
services and Bond technologies

Trained to monitor, detect prevent,
or defuse threats (not simply phone
operators that connect you to 911)

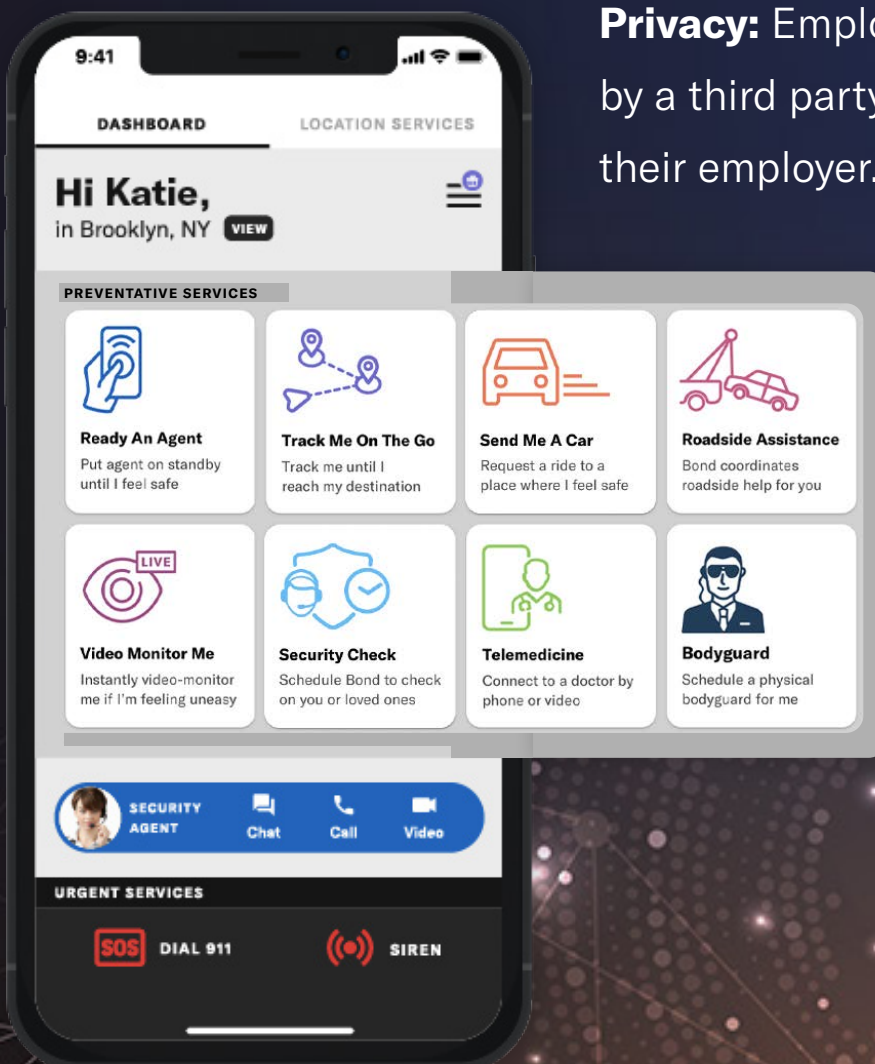

Will guide and aid your employees,
plus orchestrate first responders

Professional. Empathetic. Trusted.

Bond Personal Monitoring Services:

Bond is always by your employees' side, wherever they are, combining cutting-edge technologies and AI with Bond Personal Security Agents in Bond Command Centers who respond within seconds via the Bond App.

Privacy: Employees prefer monitoring by a third party – Bond, rather than their employer.

Bond Security Agents and technologies will monitor your safety while preserving your privacy.

“Ready An Agent”

Allows you to instantly get a Bond agent and Bond technologies to pay attention to you - but not intervene. If you release the button on the Bond app screen and do not enter your personal password, that is a sign for a Bond agent to appear on video, on your phone in order to check on you and help you. This can be used when you are walking from your car to the elevator in a parking garage, or when a delivery person comes to your apartment.

“Track Me On The Go”

Have Bond technologies and agents monitor you and potentially detect deviations from route, pace or mobility patterns when you or your loved ones are in transit.

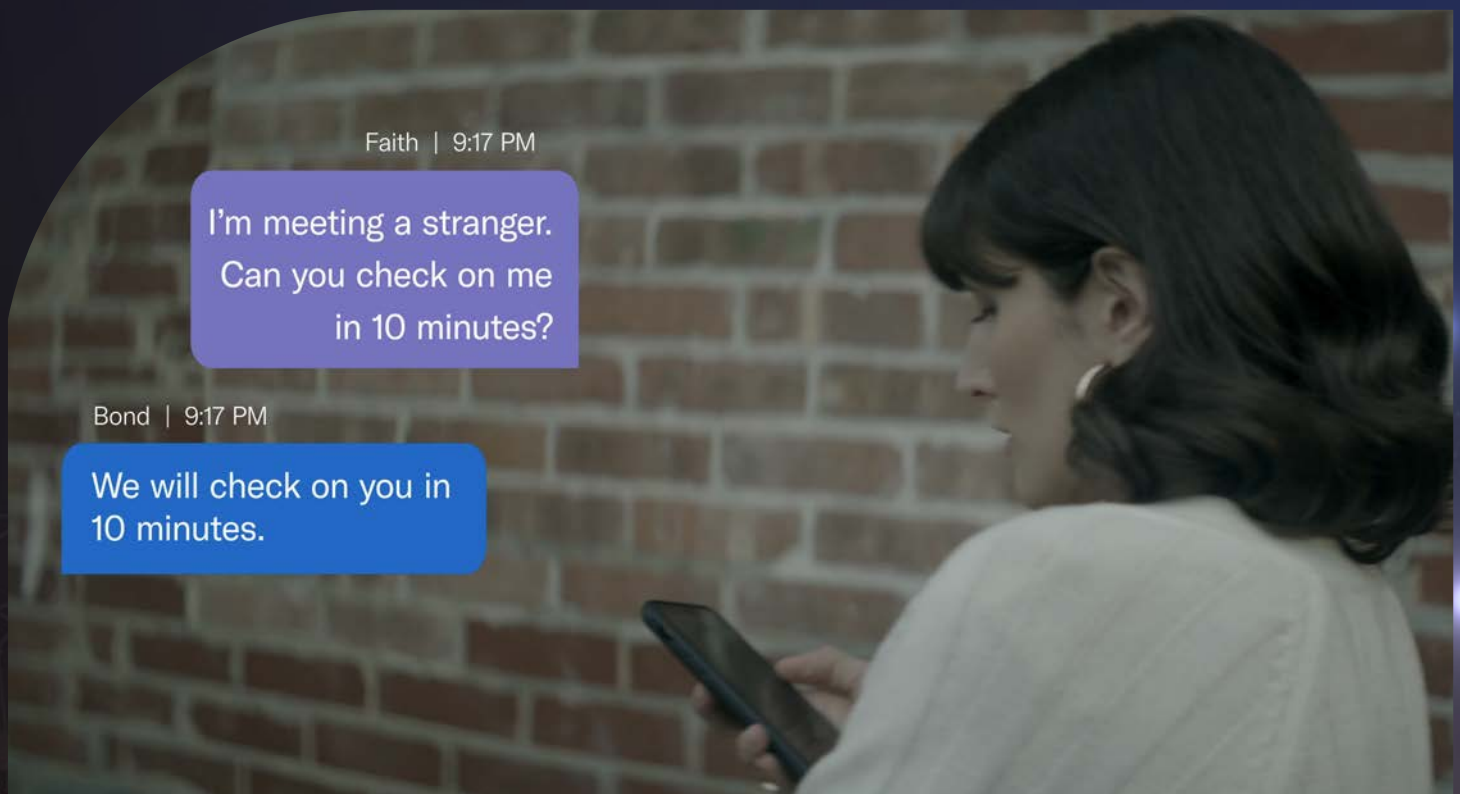

Bond can potentially detect a risk, check on you, even intervene in order to prevent an emergency, or to orchestrate first responders to help you.

“Security Check”

Allows you to schedule a time for Bond to check on you. You may be entering a situation that's not comfortable, perhaps a real-estate agent showing a property to a prospective client or a delivery person, nurse, cleaning person or technician going into someone's house. If Bond checks on you and you do not respond, Bond will take steps to help you including orchestrating assistance.

“Video Monitor Me”

A Bond Personal Security Agent appears on video, right on your phone, within seconds. The Bond Agent is trained to guide you, orchestrate assistance, and even deter an approaching stranger by telling the stranger that this video session is being recorded.

Personal Security as a Service (PSaaS):

Security solutions are very costly.

Your company would have to buy software, provision space and equipment, and hire IT and security personnel to manage a security program every day.

This is how the IT industry was before Amazon Web Services – that's how corporate security was before Bond.

PSaaS with Bond:

1

Easy to implement requiring no additional infrastructure – your employees download the app and go

2

Affordable with no setup costs, no physical footprint, and no additional resources needed by you

3

Scales instantly via subscription-based model that lets you determine who gets service, adding or subtracting as needed

4

Bond takes care of all the rest as an extension of your organization

Your Employees Will Love Bond!

Bond App Store Rating:

4.8

out of 5

@Monica Williams

Brilliant, thank you! I've been waiting for a service like this to come out, and here it is. As a woman who travels for work, and am often alone in strange places, this app is now my new best friend.

@Bennisima

If you are a real estate agent or a frequent runner or a nurse walking to your car at 3 a.m. you NEED this app! This is the best thing out there to keep you safe and secure. I recommend it to all my friends and family and those I truly care about. This app will change your life for the better!
